

SUMMARY

Experienced PM with 5 years of success in introducing large scale software and hardware projects with full oversight for design, development, testing and deployment. Defined tech requirements and schedule for project deliverables and timeline.

EDUCATION

B.S. Computer Science | Stony Brook University, Stony Brook, NY

2008 – 2014

Specialized in web development.

EXPERIENCE

Product Manager | Nextless IoT 2017 –

Nextless is an IDG backed company that aims to connect daily objects through IoT infrastructure. My duties included organizing national sales channels to build product awareness. Created innovative user interface resulting in 80% increase in user retention rate in 3 months after launched. Setting up vendor contracts and correlated external projects on requests.

- Pitched new products to board members, including a newly designed smart locks, and resulted in 300% increase in unit sales compared to the company's traditional smart locks.

Project Manager | Terminus IoT 2015 – 2017

Terminus is an IDG backed company that aim to be the next AWS in internet of things, and closed a \$200 million in round B recently. My job was to coordinate internal and external IT team to ensure project deliverables and job scheduling with oversight for product executives.

- Provided project requirements to team leaders to setup project timeline and progress
- Negotiated supplier contracts to better fit our project's specific timeline

Tech Event Translator | Mylio 2017

Worked closely with the founder of Mylio and former CTO of Microsoft, David Vaskevitch. **Provided** real-time translation at events with 500+ **attendees** including journalists and potential investors, and was able to deliver accurate translations of tech terms due to my background.

Co-Founder | WeeWeeFree App 2013 –

A restroom finder App for travelers. Founded during senior year of college, duties include development for iOS, Android App and database design. Our remote team is located in China, and to resolve time zone differences, we implemented an open system for all members to monitor and supervise each other's work. When new team members are introduced, in order for them to better understand our product, we setup a footprint structure that is similar to block-chain, with details of the first prototype to latest development and beyond.

SKILLS

- ❖ Full stack web developer in JavaScript, HTML, PHP and MySQL
- ❖ PM Software Monday, Teambition and Jira
- ❖ Fluent in Mandarin (繁體以及简体讀寫皆通用)
